# Joseph Cosmos

07042273878 Uyo, Akwaibom state josephcosmos743@gmail.com

github.com/Aniebiet1 x.com/josephcosmos01 py50c.xyz

## Skills

Machine Learning Engineer 8

Recommendation models, classification, evaluation

Agentic AI & Autonomous Systems 7

(LangChain, AutoGen, CrewAI)

Cloud/DevOps 8

Google Cloud Console, IAM, ML deployment

LLM 10

tool-calling, prompt engineering & multi-agent orchestration

RAG systems, embeddings, vector search 5

Python, Docker, Git, Firestore, Gemini API 8

## Work experience

**Acadeva** 2024-04 - present

Ai/Ml engineer, Backend dev, DevOps

- Built core AI/ML models, including recommendation systems.
- Developed agentic workflows for academic support.
- Managed Google Cloud infrastructure and DevOps.
- Automated internal operations with AI agents and Python scripts.

**Lawdam** 2025-05 - Present

AI/ML Engineer & Backend Systems Developer

- Built Lawdam's core AI/ML systems, including vector embeddings for efficient retrieval and context matching.
- Built backend workflows that powered structured content processing and scalable model execution.
- Optimized AI pipelines for accuracy, performance, and multi-book reasoning.

**AraCare** 2024-09 - 2025 - 05

AI Symptom Checker & Health Triage Agent

- Developed medical reasoning agents.
- Implemented symptom analysis and triage workflows.
- Built RAG-powered medical knowledge retrieval.

### Leadership & Community Experience

**PY50 Community** 2023-05 - present

Co-founder & Tutor

- Co-founded a tech learning community training beginners in programming, AI, Web development(basics), Web development(with React), Backend development.
- Taught 70+ students and created practical project-based learning tracks.

**Google Developers Group on-campus, University of Uyo** 2025-09 - present

AI/ML Co-Lead

- Led workshops on AI, ML, agentic systems, and cloud.
- Mentored student teams building AI projects.

## Education

**University of Uyo** present

B.Sc. Computer Science (300 Level), University of Uyo
2022-Present
